Application No.: 10/662,296

Amendments to the Claims:

This listing of the claims will replace all prior versions and listings of claims in the application:

Listing of Claims:

Claims 1-15 (canceled)

16 (currently amended): A stamper for embossing a servo pattern in a surface of a layer of a hydrophilic sol-gel formed on a surface of a substrate for a magnetic recording medium, comprising:

- (a) a main body having an embossing surface including a negative image of said servo pattern, wherein said main body is formed of a first metal; and
- (b) means for facilitating release of said embossing surface of said stamper from said surface of said layer of sol-gel subsequent to embossing of said servo pattern, wherein said embossing surface is formed of platinum, carbon, or a hydrophobic polymer.

17 (canceled)

18 (currently amended): The stamper as in claim [[17]] <u>16</u>, wherein said hydrophobic polymeric material polymer comprises an amorphous thermoplastic material.

19 (canceled):

20 (currently amended): The stamper as in claim [[19]] <u>16</u>, wherein said first metal is nickel and said embossing surface is formed of platinum, carbon, or <u>hydrophobic polymer is</u> a sputtered hydrophobic polymer.

21 (new): The stamper as in claim 16, wherein said embossing surface is formed of a polycarbonate, a polyetherimide, a polypropylene, or a polyethylene.

Application No.: 10/662,296

22 (new): The stamper as in claim 21, wherein said embossing surface is formed of a polyetherimide.

23 (new): A stamper for embossing a servo pattern in a surface of a layer of a hydrophilic sol-gel formed on a surface of a substrate for a magnetic recording medium, comprising:

a main body having an embossing surface including a negative image of said servo pattern, wherein said embossing surface is formed of platinum, carbon, a polycarbonate, a polyetherimide, a polypropylene, or a polyethylene.

24 (new): The stamper as in claim 23, wherein said main body is formed of a hydrophobic polymeric material.
